CONTACT: STEVE SMITH, VP of SALES

American Plating Power (APP) offers the most extensive DC power supply product line available anywhere. Switch mode (IGBT) and SCR rectifiers from 100 watts up to 2MW. APP switch modes are highly efficient, with a high Power Factor and low ripple. Our SCR rectifiers are the most efficient in the industry. And all our rectifiers are 100% duty cycle. Air, water, or oil cooled. Other styles include variable transformer, pulse, reverse pulse, Ecoat, high voltage, and DCAC color anodize systems. Wide variety of controls options. Excellent aftermarket support. Spare parts available for all makes and models.

E-MAIL: [info@datcomanufacturing.com](mailto:info@datcomanufacturing.com)  
WEBSITE: [www.datcomanufacturing.com](http://www.datcomanufacturing.com)

CONTACT: MICHAEL DATUS

At DATCO MFG, we are the company to call on for all your plating equipment needs. We are able to customize the largest computerized plating shop from the floor to the ceiling, yet able to handle the smallest tank order. We do on-site equipment repair and installation. We offer full one-year warranties on all equipment we manufacture.

**STAINLESS STEEL & TITANIUM CUSTUM ORDER TANKS:**

Our steel tanks are manufactured from a 304 or 316 Stainless Steel and our Titanium tanks are made from chemical resistant Titanium. The welds are of high tensile rod with full penetration. The tanks are welded inside and out, including the corners, which are woven to insure the strong leak proof protection. Since we shear our own steel, your tanks are the size you ask for, not the size the sheet came in. We then leak test them.

Our polypropylene tanks are from American ONLY made virgin polymers. Our tanks are not cut but are heat formed so the corners never leak. Professionally trained workers, with ten years or more of experience, hand-weld each and every tank themselves. All rims are custom machined to fit on the wall of the tank and double welded. The sheets are Wagner automated Mirror welder to make our welds. (It does one hundred percent original strength welds.)

After applying the latest in technology to the assembly of your tank, we thoroughly test your tank with the latest in diagnostic test equipment. The welds are electronically tested twice over 24 hours. Then the steel supports are welded on and the uni-body encapsulation is put on.

**DATCO MANUFACTURING (continued)****TABLE # 25**

We also make complete systems. We have complete lines for gold plating, electroless nickel, aqueous cleaning, to Electro-cleaning, phosphate, and alodine to anodize.

If you would like to know more about DATCO and the services we offer, please feel free to contact us. We will be glad to help you in any way that we possibly can.

CONTACT: KARL HAWKINS

Leavitt-Pacific Insurance Brokers provides comprehensive insurance solutions to California employers seeking effective management of their property casualty insurance programs. As a member of Leavitt Group - now the nation's 7th largest privately held broker - we are effectively positioned to provide best of class resources, services and carrier concessions to our client partners.

Our proprietary 'Differentiation Platform' allows our clients to control costs, mitigate risk, and enjoy 'value added services' that make the management of their programs easy and cost efficient.

We specialize in firms with 15-500 employees across all industry sectors throughout the state as well as nationwide capabilities. Our niche market approach allows us to maximize our success within the metal finishing industry to bring quality coverage and excellent prices to your business.

If you are a successful business that feels they are outgrowing their current broker - and wondering, "what more is available to me" in terms of managing your firm's insurance programs. Contact us for a free consultation!

TrinSoft's PHTPlus is a powerful ERP solution for Plating, Heat Treating and Finishing Services on a local or global scale. PHTPlus is built for the outsourced manufacturing service company specializing in finishing services such as plating and coating. The solution is designed to give you a single view into all systems, delivering the control and insight you need to streamline processes, reduce costs and increase margins. PHTPlus is designed to work the way you do. It's for companies like yours that receive customers' parts, perform a process on them, and send those parts back to the customer.

Since 1938, Univertical continues to be committed to manufacturing superior quality Copper anodes and Copper and Nickel chemicals for the worldwide plating industry. Whether it's through the invention of the titanium and graphite baskets, the introduction of phosphorized anodes, or novel manufacturing techniques, we have always been the leader in the industry. Univertical also partners with global industry leaders Vale and Draslovka, to offer high quality plating anodes and cyanides for your plating needs.
