Your Partner in Start-to-Finish Industrial Chemical Solutions

For over 60 years, **Coral Chemical Company** has been providing complete start-to-finish process efficiency solutions to the metal finishing industry. Utilizing our specialty industrial chemical products, Coral's team of pretreatment, metal working and wastewater treatment chemical experts partner with our customers

CORAL CHEMICAL COMPANY (continued)**TABLE # 43**

to improve production, lower operational costs, reduce waste and comply with regulatory requirements.

Pretreatment Chemicals - Coral's industrial pretreatment chemicals include a full line of metal pretreatment products. From cleaning to conversion coatings to final rinses, Coral can supply everything needed to prepare metal and plastic products for the application of a coating.

Metal Working Fluids - Coral's metal working fluids include high-quality machining fluids, metal forming lubricants and rust preventatives. Whether your process is cutting, grinding, roll-forming, blanking, forming or protecting processed parts; Coral can provide the best solution for your unique challenges.

Process Water Treatment - Coral's total management concept for the metal finishing industry includes an extensive line of process water treatment chemicals. From neutralizing waste water to precipitating heavy metals to dissolving phosphates, our water treatment chemicals reduce sludge and clarify waste water.

Technical Expertise That Delivers Results - In the lab or in the field, our comprehensive technical support and persistent problem-solving capabilities result in superior parts performance and quality. Our fast turnaround on process resolutions and product delivery help our customers stay competitive and profitable.

Simply put... Coral adds just the right chemistry for results.

E-MAIL: info@datcomanufacturing.com
WEBSITE: www.datcomanufacturing.com

TABLE # 14A

CONTACT: MICHAEL DATUS

At **DATCO MFG**, we are the company to call on for all your plating equipment needs. We are able to customize the largest computerized plating shop from the floor to the ceiling, yet able to handle the smallest tank order. We do on-site equipment repair and installation. We offer full one-year warranties on all equipment we manufacture.

STAINLESS STEEL & TITANIUM CUSTUM ORDER TANKS:

Our steel tanks are manufactured from a 304 or 316 Stainless Steel and our Titanium tanks are made from chemical resistant Titanium. The welds are of high tensile rod with full penetration. The tanks are welded inside and out, including the corners, which are woven to insure the strong leak proof protection. Since we shear our own steel, your tanks are the size you ask for, not the size the sheet came in. We then leak test them.

POLYPROPYLENE CUSTOM ORDER TANKS:

Our polypropylene tanks are from American ONLY made virgin polymers. Our tanks are not cut but are heat formed so the corners never leak. Professionally trained workers, with ten years or more of experience, hand-weld each and every tank themselves. All rims are custom machined to fit on the wall of the tank and double welded. The sheets are Wagner automated to make our seams. (It does one hundred percent original strength welds.)

DATCO MFG (continued)**TABLE # 14A**

After applying the latest in technology to the assembly of your tank, we thoroughly test your tank with the latest in diagnostic test equipment. The welds are electronically tested twice over 24 hours. Then the steel supports are welded on and the uni-body encapsulation is put on.

We also make complete systems. We have complete lines for gold plating, electro-less nickel, aqueous cleaning, to Electro-cleaning, phosphate, and alodine to anodize.

If you would like to know more about DATCO and the services we offer, please feel free to contact us. We will be glad to help you in any way that we possibly can.
