CONTACT: CARY MATTHEWS

Anachem has been providing excellent quality control laboratory services to the metal finishing industry since 1948.

We are Nadcap and A2LA approved and hold all the major prime approvals: Boeing, Airbus, Bombardier, Lockheed, Northrop, Snecma.

We aim to be a full-service laboratory meeting all your coating needs. Our services include salt spray, humidity, CASS, abrasion resistance, coating weight, adhesion, and electrical resistance testing. Our laboratory is also capable of doing metallographic testing such as IGA/EGP, microhardness and microthickness as well as hydrogen embrittlement. We also provide process solution control analysis on a very fast turnaround.

Bridge Safety Consultants helps companies reduce injuries and claims by engaging workers and boosting morale. We accomplish this through a safety incentive program that relies on Humor to connect and effectively deliver the message that safety is the most important part of their job. Monthly safety meetings with awards and recognition makes safety more personal. The result is fewer injuries and claims, and outstanding savings on Workers' Compensation costs.

**TABLE # 59**CONTACT: RON LUM**Your Partner in Start-to-Finish Industrial Chemical Solutions**

For over 60 years, **Coral Chemical Company** has been providing complete start-to-finish process efficiency solutions to the metal finishing industry. Utilizing our specialty industrial chemical products, Coral's team of pretreatment, metal working and wastewater treatment chemical experts partner with our customers to improve production, lower operational costs, reduce waste and comply with regulatory requirements.

**Pretreatment Chemicals** - Coral's industrial pretreatment chemicals include a full line of metal pretreatment products. From cleaning to conversion coatings to final rinses, Coral can supply everything needed to prepare metal and plastic products for the application of a coating.

**Metal Working Fluids** - Coral's metal working fluids include high-quality machining fluids, metal forming lubricants and rust preventatives. Whether your process is cutting, grinding, roll-forming, blanking, forming or protecting processed parts; Coral can provide the best solution for your unique challenges.

**CORAL CHEMICAL COMPANY (continued)**

**TABLE # 59**

**Process Water Treatment** - Coral's total management concept for the metal finishing industry includes an extensive line of process water treatment chemicals. From neutralizing waste water to precipitating heavy metals to dissolving phosphates, our water treatment chemicals reduce sludge and clarify waste water.

**Technical Expertise That Delivers Results** - In the lab or in the field, our comprehensive technical support and persistent problem-solving capabilities result in superior parts performance and quality. Our fast turnaround on process resolutions and product delivery help our customers stay competitive and profitable.

**Simply put... Coral adds just the right chemistry for results.**

Mr. Figueroa helps managers and CEOs to have more time to do their job, and to focus on what is important to them, instead of being distracted by having to deal with problems that their Hispanic leads and supervisors should be taking care of.

The way that Eduardo helps companies to produce more profits is by designing, in conjunction with upper-management, the best and more effective training program that will teach participants how to develop more effective leadership skills, to achieve their goals with more collaboration of their team and without mistakes. Attendees to the training classes become more pro-active in solving problems and conflicts.

Hitachi High-Tech is a leading manufacturer of high precision x-ray fluorescence (XRF) analyzers used in surface finishing quality control. The Hitachi XStrata 920 XRF analyzer is featured for coating thickness measurements, composition analysis, and plating bath analysis. The analyzer offers many innovative features to streamline throughput and data management.

Brady Technical Services, Inc. is the west coast distributor for Hitachi, and will be demonstrating the Hitachi XStrata 920 XRF analyzer. Attendees are encouraged to bring sample material for review and to discuss coating applications that are critical to their organization.

Leavitt-Pacific Insurance Brokers provides comprehensive insurance solutions to California employers seeking effective management of their property casualty insurance programs. As a member of Leavitt Group - now the nation's 7th largest privately held broker - we are effectively positioned to provide best of class resources, services and carrier concessions to our client partners.

Our proprietary 'Differentiation Platform' allows our clients to control costs, mitigate risk, and enjoy 'value added services' that make the management of their programs easy and cost efficient.

We specialize in firms with 15-500 employees across all industry sectors throughout the state as well as nationwide capabilities. Our niche market approach allows us to maximize our success within the metal finishing industry to bring quality coverage and excellent prices to your business.

If you are a successful business that feels they are outgrowing their current broker - and wondering, "what more is available to me" in terms of managing your firm's insurance programs....contact us for a free consultation!

CONTACT: JOHN KOEHLER

Yorke Engineering, LLC has assisted over 700 customers with their air quality and environmental compliance and permitting issues. Our philosophy is to efficiently help government and industrial customers with the complex array of environmental regulations issued by the local, state, and federal agencies. From small companies to the largest of California's organizations, Yorke has successfully helped solve our clients' air quality and environmental issues in a cost-effective manner. Our staff of over 40 technical specialists has over 800 years of combined environmental experience and consists of engineers that specialize in air quality, waste, water, CEQA, and safety.
