Advance Paper Systems, Inc. is a full service packaging organization that delivers all over the greater bay area. Our fast, flexible, and responsive team provide stock and custom packaging, specialty tapes, kraft paper, cushioning products, janitorial supplies, clean room, and a variety of safety supplies like gloves and masks. We have the lowest free delivery minimums in the Bay Area and we work hard to tailor an offering that fits your specific needs. Let our design team also provide you a review on any custom packaging to see if we can help improve or streamline your process. We also offer JIT for those specific custom needs to assist your inventory flow. Please contact us today for a review of your packaging needs. We will make a positive difference.

American Plating Power (APP) offers the most extensive DC power supply product line available anywhere. Switch mode (IGBT) and SCR rectifiers from 100 watts up to 2MW. APP switch modes are highly efficient, with a high Power Factor and low ripple. Our SCR rectifiers are the most efficient in the industry. And all our rectifiers are 100% duty cycle. Air, water, or oil cooled. Other styles include variable transformer, pulse, reverse pulse, Ecoat, high voltage, and DCAC color anodize systems. Wide variety of controls options. Excellent aftermarket support. Spare parts available for all makes and models.

TABLE # 19

CONTACT: MICHAEL DATUS

At DATCO MFG, we are the company to call on for all your plating equipment needs. We are able to customize the largest computerized plating shop from the floor to the ceiling, yet able to handle the smallest tank order. We do on-site equipment repair and installation. We offer full one-year warranties on all equipment we manufacture.

STAINLESS STEEL & TITANIUM CUSTUM ORDER TANKS:

Our steel tanks are manufactured from a 304 or 316 Stainless Steel and our Titanium tanks are made from chemical resistant Titanium. The welds are of high tensile rod with full penetration. The tanks are welded inside and out, including the corners, which are woven to insure the strong leak proof protection. Since we shear our own steel, your tanks are the size you ask for, not the size the sheet came in. We then leak test them.

Our polypropylene tanks are from American ONLY made virgin polymers. Our tanks are not cut but are heat formed so the corners never leak. Professionally trained workers, with ten years or more of experience, hand-weld each and every tank themselves. All rims are custom machined to fit on the wall of the tank and double welded. The sheets are Wagner automated to make our seams. (It does one hundred percent original strength welds.)

After applying the latest in technology to the assembly of your tank, we thoroughly test your tank with the latest in diagnostic test equipment. The welds are electronically tested twice over 24 hours. Then the steel supports are welded on and the uni-body encapsulation is put on.

DATCO MANUFACTURING (continued)**TABLE # 19**

We also make complete systems. We have complete lines for gold plating, electroless nickel, aqueous cleaning, to Electro-cleaning, phosphate, and alodine to anodize.

If you would like to know more about DATCO and the services we offer, please feel free to contact us. We will be glad to help you in any way that we possibly can.
