American Plating Power (APP) offers the most extensive DC power supply product line available anywhere. Switch mode (IGBT) and SCR rectifiers from 100 watts up to 2MW. APP switch modes are highly efficient, with a high Power Factor and low ripple. Our SCR rectifiers are the most efficient in the industry. And all our rectifiers are 100% duty cycle. Air, water, or oil cooled. Other styles include variable transformer, pulse, reverse pulse, Ecoat, high voltage, and DCAC color anodize systems. Wide variety of controls options. Excellent aftermarket support. Spare parts available for all makes and models.

Anachem has been providing excellent quality control laboratory services to the metal finishing industry since 1948.

ANACHEM LABORATORIES (continued)**TABLE # 29**

We are Nadcap and A2LA approved and hold all the major prime approvals: Boeing, Airbus, Bombardier, Lockheed, Northrop, Snecma.

We aim to be a full-service laboratory meeting all your coating needs. Our services include salt spray, humidity, CASS, abrasion resistance, coating weight, adhesion, and electrical resistance testing. Our laboratory is also capable of doing metallographic testing such as IGA/EGP, microhardness and microthickness as well as hydrogen embrittlement. We also provide process solution control analysis on a very fast turnaround.

E-MAIL: info@membrion.comWEBSITE: www.membrion.comCONTACT: MIKE BOTROS

Membrion manufactures ceramic desalination membranes that can reduce the volume of hazardous metal wastewater by up to 98%. Membrion's electro-ceramic desalination process will selectively remove salts, metals, and minerals from wastewaters that also contain extreme acidity, oxidizers, foulants & chelators, scalants, small particles, and/or residual solvents. A simple retrofit enables facilities to expand their wastewater treatment capacity, reduce operating expenses, meet changing regulations and improve ESG outcomes. Membrion has an award-winning technology and is financially backed by multi-national semiconductor companies with similar treatment requirements for complex metal wastewater streams.

The Sanitation Districts' Industrial Waste Section administers the EPA's Pretreatment Program for significant and Categorical industries within its service area including many metal finishing facilities. As a Control Authority, the Section issues industrial wastewater discharge permits, inspects and monitors facilities, and enforces the EPA regulations and the Sanitation Districts' Wastewater Ordinance. The Sanitation Districts' staff will be available at the Supplier Showcase to answer general question regarding permitting, federal and local regulations, reporting and compliance.
